

CAREER OPPORTUNITIES

WHO WE ARE – The Air Force Research Laboratory’s Directed Energy Directorate is one of the most exciting organizations in the United States Air Force and presents some of the most rewarding job opportunities in the nation. Our scientists and engineers – a team of diverse professionals – performs and synthesizes basic research, exploratory and advance technology development. They are pushing the limits of air and space research, working in some of the world’s best technical facilities.

WHAT WE DO – Headquartered at Kirtland Air Force Base, New Mexico, our organization develops directed energies that can precisely project force anywhere, at anytime, with graduated intensity and at the speed of light. We focus on moderate- and high-power lasers, high-power microwaves, and advanced optics and imaging technologies.

WE’RE LOOKING FOR PEOPLE WITH DEGREE FOCUS ON...

- Astro Engineering
- Aero Engineering
- Chemical Engineering
- Computer Engineering
